Carolyn,

The boring advancement and temporary well installation at 400 Forsythe St was completed yesterday. We installed 10 temp wells at 6 locations per the work plan. We plan on low-flow sampling the temporary wells on Monday-Tuesday, July 1-2 and surveying the wells on July 2.

We were also able to repair and redevelop MW-20, so we will have it surveyed into the monitoring well network also.

Following groundwater sampling activities, we will proceed with the permanent abandonment of the temporary wells.

Thank you,  
Chris
